

PARAS KUMAR

Business Intelligence Analyst | Supply Chain & E-commerce Analytics

+919354042501 kumarparas.work@gmail.com LinkedIn GitHub Portfolio Noida, India

PROFESSIONAL SUMMARY

BI Developer with 1+ year building production-grade Power BI solutions for Supply Chain and E-Commerce operations, star schema modeling, DAX time intelligence, Power Automate pipelines, and PostgreSQL ETL. Track record of measurable impact: 40% reporting turnaround reduction, 20K+ freight overcharges identified, and on-time delivery improved from 52% to 81%

WORK EXPERIENCES

Business Intelligence Analyst | Power BI, DAX, Power Query, Excel

Sep 2025 - Present

Mars Cosmetics

Delhi

- **Developed** and managed Power BI dashboards for **Sales, RTV, Fill Rate, and Freight** across 10+ channels; created MTD/YTD/YoY DAX measures and drill-through reports, reducing reporting turnaround by **40%** and freeing operations team **4+** hours weekly.
- **Built** a PostgreSQL ETL pipeline for GRN, Fill Rate, and Freight analytics using window functions (LAG, ROW_NUMBER) and JOINs; enhanced data accuracy by **25%** and eliminated manual refresh cycles, saving **3+** hours per week in report preparation.
- **Automated** daily pipelines using Power Automate and SharePoint Online to Power BI Service Scheduled Refresh; removed manual uploads across 3 teams, decreasing data errors by **20%** and providing same-day visibility to operations leads.
- Modeled weight-slab and zone-based rate logic in DAX to compare billed freight against contracted rates. The model surfaced 20K+ in annual overcharges across 4 courier partners something that had never been tracked before. That output went directly into vendor negotiations
- Built a drill-through model using ad-hoc analysis that went from channel-level fill rate all the way down to SKU x warehouse stage x reason code. That granularity let us identify that 12 specific fast-movers were consistently below 60% not because of demand forecasting, but because of manpower allocation at pick stage. That finding drove a targeted fix.
- **Developed** an RTV Dashboard categorizing returns by reason code and ownership across 10+ channels; integrated insights into vendor reviews, reducing repeat-issue return rates by **10%** and decreasing reverse logistics costs by **8K+** monthly.
- **Created** an E-commerce Sales Dashboard connecting 5+ Excel sources with inconsistent schemas via Power Query M; built a Star Schema Data Model with automated daily refresh and channel-wise drop alerts, reducing ad-hoc data requests by **~30%**.
- **Developed** multi-dimensional courier performance analytics 1600+ monthly shipments across 12 logistics partners, identifying high-TAT carriers for replacement, improving on-time delivery by **~30%** and reducing average delivery TAT by over 1 day.

SKILLS

Tools :	Power BI Desktop/Service, Power Automate, SharePoint Online, Microsoft Dynamics 365 BC
Languages :	DAX, Python (Pandas, NumPy), M Code
Databases :	PostgreSQL
Domain Knowledge :	Supply Chain Analytics, E-commerce Reporting, Fill Rate, RTV, Freight Cost Analysis, MIS Reporting

PROJECTS

Delivery TAT Analysis | LINK

Jun 2026 - Jul 2026

Mars Cosmetics

- Developed a **Power BI logistics analytics solution** for **1,600+ monthly shipments** across **12 courier partners**, identifying regional and courier-level bottlenecks that reduced **delivery TAT by 1.4 days** and increased **on-time deliveries from 52% to 81%**.
- Automated freight, SLA, and courier performance reporting using **Power BI, DAX, and Power Query**, enabling data-driven courier optimization and significantly reducing manual reporting efforts.

GRN & TAT Analytics Dashboard | LINK

Nov 2025 - Dec 2025

- **Developed and managed a GRN Operations Dashboard** in **Power BI** utilizing a **star schema data model** to monitor **GRN completion rates, pending receipts, and stage-wise turnaround time (TAT)** across warehouse processes. Created DAX measures for SLA monitoring and identified **2 critical bottleneck stages** responsible for **over 40% of total processing delays**, facilitating targeted process improvement initiatives.
- **Streamlined the reporting pipeline** by integrating **SharePoint Online, Power Automate, and Power BI Service scheduled refresh**, eliminating manual Excel tracking. Achieved near real-time visibility into GRN performance metrics and saved the operations team **3+ hours per week** previously dedicated to report preparation and reconciliation.

EDUCATION

Delhi University

Sep 2022 - May 2025

Bachelor Of Commerce
