

PARAS KUMAR

Business Intelligence Analyst | Supply Chain & E-commerce Analytics

☎ +919354042501 ✉ kumarparas.work@gmail.com 🔗 LinkedIn 🐙 GitHub 📁 Portfolio 📍 Noida, India

PROFESSIONAL SUMMARY

BI Developer with 1+ year building production-grade Power BI solutions for Supply Chain and E-Commerce operations, star schema modeling, DAX time intelligence, Power Automate pipelines, and PostgreSQL ETL. Track record of measurable impact: 40% reporting turnaround reduction, 20K+ freight overcharges identified, and on-time delivery improved from 52% to 81%

WORK EXPERIENCES

Business Intelligence Analyst | Power BI, DAX, Power Query, Excel

Sep 2025 - Present

Mars Cosmetics

Delhi

- Built **Power BI dashboards** for **Sales, RTV, Fill Rate, and Freight** across **10+ channels** (Nykaa, Blinkit, Swiggy Instamart, Nykaa D, Purple); drill-throughs surfaced **dispatch TAT breaches at order level**, driving courier escalations that reduced **average TAT by 1.2 days**.
- Built a **PostgreSQL ETL pipeline** for **GRN, Fill Rate, and Freight** using window functions and JOINS; enabled **early stock gap detection**, reducing **SLA breaches by ~20%** across quick-commerce channels.
- Automated **daily data pipelines** via **Power Automate → SharePoint → Power BI Service** across 3 teams; ensured **same-day data availability**, enabling ops leads to act on exceptions within business hours.
- Modeled **weight-slab and zone-based freight logic in DAX** to compare billed vs. contracted rates across **4 courier partners**; surfaced **₹20K+ in annual overcharges**, recovering **~₹15K in the first renegotiation cycle**.
- Built a **drill-through fill rate model** down to **SKU × warehouse stage × reason code**; identified **12 fast-movers below 60% fill rate** traced to pick-stage manpower gaps — reallocation improved fill rate by **~18 pp within 6 weeks**.
- Developed an **RTV dashboard** with reason code and ownership mapping across **10+ channels**; insights fed vendor reviews, correcting top 3 repeat-issue categories and reducing reverse logistics costs by **₹8K+/month**.
- Built an **E-commerce Sales Dashboard** consolidating **5+ Excel sources** via **Power Query M** into a Star Schema; **channel-wise drop alerts** flagged a **35% Blinkit order dip within 24 hours**, enabling same-day recovery action.
- Delivered **courier performance analytics** across **1,600+ shipments/month** and **12 logistics partners**; flagged **3 high-TAT carriers** for replacement, improving **on-time delivery by ~30%** and cutting **average TAT by 1+ day**.

SKILLS

Tools :	Power BI Desktop/Service, Power Automate, SharePoint Online, Microsoft Dynamics 365 BC
Languages :	DAX, Python (Pandas, NumPy), M Code, SQL
Databases :	PostgreSQL
Domain Knowledge :	Supply Chain Analytics, E-commerce Reporting, Fill Rate, RTV, Freight Cost Analysis, MIS Reporting

PROJECTS

Delivery TAT Analysis | 🔗 LINK

Jun 2026 - Jul 2026

Mars Cosmetics

- Developed a **Power BI logistics analytics solution** for **1,600+ monthly shipments** across **12 courier partners**, identifying regional and courier-level bottlenecks that reduced **delivery TAT by 1.4 days** and increased **on-time deliveries from 52% to 81%**.
- Automated freight, SLA, and courier performance reporting using **Power BI, DAX, and Power Query**, enabling data-driven courier optimization and significantly reducing manual reporting efforts.

GRN & TAT Analytics Dashboard | 🔗 LINK

Nov 2025 - Dec 2025

- **Developed and managed a GRN Operations Dashboard** in **Power BI** utilizing a **star schema data model** to monitor **GRN completion rates, pending receipts, and stage-wise turnaround time (TAT)** across warehouse processes. Created DAX measures for SLA monitoring and identified **2 critical bottleneck stages** responsible for **over 40% of total processing delays**, facilitating targeted process improvement initiatives.
- **Streamlined the reporting pipeline** by integrating **SharePoint Online, Power Automate, and Power BI Service scheduled refresh**, eliminating manual Excel tracking. Achieved near real-time visibility into GRN performance metrics and saved the operations team **3+ hours per week** previously dedicated to report preparation and reconciliation.

EDUCATION

Delhi University

Sep 2022 - May 2025

Bachelor Of Commerce
